### **DETAILED ACTION**

As a preliminary matter, the examiner would like to acknowledge the preliminary amendment filed July 9, 2002. Applicants stated they have amended claims 4-14, 17-20, 25, 29, 30, 32, 33, 35, and 39-44. No amendment was received for claim 44. Applicants have cancelled claim 38. It is noted, that although applicants have cancelled claim 38, page 5 of the preliminary amendment states "Claims 1-43 are pending". As the application currently stands, claims 1-37 and 39-44 are pending, not claims 1-43. Additionally, as a preliminary matter, claim 39 depends from claim 38, which has been cancelled.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-26, drawn to methods and kits for nucleic acid binding and isolation wherein the solid phase contains both hydrophobic and hydrophilic groups on the surface, and the nucleic acid solution and solid phase are reacted in the presence of a salt and polyethylene glycol.

Group II, claim(s) 27-37 and 39-44, drawn to methods and kits for nucleic acid binding and isolation wherein the solid phase contains only hydrophilic groups, and the nucleic acid solution and solid phase are reacted in the presence of only a salt or only polyethylene glycol.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the general inventive concept appears to relate to the provision that the nucleic acids are reversibly and non-sequence-specifically bound to the surface. The prior art discloses large numbers of this type of method, such as US Patent 5,705,628. Therefore, this general concept loses its validity and the application thus relates to two

inventions which are not linked by a general inventive concept within the meaning of PCT Rule 13.1 and 13.3.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
